1. **Operating results**

(1) Analysis of operation results

(i) Overview of performance for the consolidated fiscal year under review

	Year ended March 2007	Year ended March 2008	Comparison with the previous year	
	Amount	Amount	Change	Rate of change (%)
Net sales (million yen)	88,270	88,568	298	0.3
Operating income (million yen)	5,943	5,370	-572	-9.6
Ordinary income (million yen)	6,302	5,684	-617	-9.8
Net income (million yen)	3,353	3,174	-179	-5.3
Net income per share (yen)	174.90	164.98	-9.92	-5.7

During the fiscal year under review, the feeling began to spread in Japan that the economy would slow from now on, reflecting the effects of the subprime mortgage problem in the U.S. on the international financial market, price hikes of oil and raw materials, and abrupt exchange rate fluctuations.

In the medical equipment industry, various items have been changed, including: the revision of official reimbursement prices for medical treatment fees, drug prices and specific medical materials covered by insurance; and expansion of the adoption of the comprehensive medical fee payment system, called DPC (diagnosis procedure combination), at medical institutions. Besides, medical system reforms led to a further division between hospitals and clinics and an expansion of the field of home medical treatment.

Under such circumstances, the Group posted consolidated net sales of 88,568 million yen in the fiscal year under review (up 0.3% from the previous year).

Gross profit margin also rose thanks to the efforts to increase sales while reducing the costs. However, profits decreased owing to an increase in payment handling fees and depreciation expenses associated with capital investments, for example, in the introduction of a system to integrate core operations. Operating income was 5,370 million yen (down 9.6%), ordinary income was 5,684 million yen (down 9.8%), and net income was 3,174 million yen (down 5.3%).

(ii) Overview of performance for the consolidated fiscal year under review by segment

Business segment	Year ended March 2007		Year ended March 2008		Comparison with the previous year	
	Amount (million yen)	Ratio (%)	Amount (million yen)	Ratio (%)	Change (million yen)	Rate of change (%)
Physiological diagnostic equipment	26,789	30.3	23,907	27.0	-2,881	-10.8
Patient monitoring equipment	7,644	8.7	7,301	8.2	-342	-4.5

Medical treatment equipment	31,122	35.3	35,083	39.6	3,961	12.7
Other products and accessories	22,713	25.7	22,274	25.2	-439	-1.9
Total	88,270	100.0	88,568	100.0	298	0.3

(1) In the Physiological diagnostic equipment segment, sales of Vascular Screening System increased because we launched new models and they were widely used in the market. Meanwhile, sales of ultrasound diagnostic imaging systems dropped substantially, affected by our sale of an overseas subsidiary. As a result, sales were 23,907 million yen (down 10.8% from the preceding year) on a consolidated basis.

(2) In the Patient monitoring equipment segment, sales rose overseas, but this still failed to offset a decline in domestic sales. As a result, sales were 7,301 million yen (down 4.5%).

(3) In the Medical treatment equipment segment, the business of renting medical equipment for home treatment (including oxygen-concentrator devices, equipment used to treat sleep apnea syndrome and homecare ventilators) remained steady. In addition, sales of automated external defibrillators (AEDs) increased substantially. As a result sales were 35,083 million yen (up 12.7%).

(4) In the Other products and accessories segment, we mainly handle recording paper, disposable electrodes and accessories, as well as consumables used for devices handled by the other segments. Sales for this segment were 22,274 million yen (down 1.9%).

(iii) Outlook for fiscal 2008

	Year ended March 2008	Year ending March 2009	Comparison with the previous year	
	Amount	Amount	Change	Rate of change (%)
Net sales (million yen)	88,568	90,000	1,432	1.6
Operating income (million yen)	5,370	5,300	-70	-1.3
Ordinary income (million yen)	5,684	5,500	-184	-3.2
Net income (million yen)	3,174	3,020	-154	-4.9
Net income per share (yen)	164.98	156.94	-8.04	-4.9

For the current fiscal year, economies in emerging countries are expected to grow, but we expect the subprime mortgage problem in the U.S. will continue to have adverse effects on the real economy and we think prices of oil and raw materials will continue to rise. Given this, it is likely that consumer spending money will slow down and companies will curtail capital expenditures.

The Group forecasts will post consolidated net sales of 90.0 billion yen, operating income of 5.3 billion yen and ordinary income of 5.5 billion yen. We expect a net income of 3,020 million yen.

(2) Analysis of financial situation

(i) Assets, liabilities and net assets

Total assets were 99,585 million yen at the end of the fiscal year under review, down 4,096 million yen from the previous year, mainly because of a decrease in cash, deposits and investment securities, despite an increase in inventories.

Liabilities amounted to 25,752 million yen, down 3,348 million yen, chiefly because of a decrease in trade notes and accounts payable.

Net assets were 73,833 million yen in total, down 748 million yen, owing primarily to a decline in net unrealized gains on other securities, despite an advance in retained earnings.

(ii) Consolidated cash flows

	Year ended March 2007	Year ended March 2008	Change
Cash flows from operating activities (million yen)	8,298	5,855	-2,443
Cash flows from investing activities (million yen)	-7,122	-7,006	116
Cash flows from financing activities (million yen)	-1,327	-1,117	209
Effect of exchange rate changes (million yen)	31	-7	-38
Increase (decrease) in cash and cash equivalents (million yen)	-120	-2,276	-2,156
Cash and cash equivalents at the end of the fiscal years (million yen)	24,297	21,958	-2,339

Cash flows from operating activities

In the fiscal year under review, net cash provided by operating activities was 5,855 million yen, down 2,443 million yen from the previous year, reflecting net income before taxes of 6,143 million yen, depreciation of 5,139 million yen and a decrease in accounts payable of 2,609 million yen.

Cash flows from investing activities

Net cash used in investing activities was 7,006 million yen, down 116 million yen. Payments for the acquisition of tangible fixed assets amounted to 4,576 million yen and securities and investment securities were 2,713 million yen.

Cash flows from financing activities

Net cash used in financing activities was 1,117 million yen, down 209 million yen, mainly because of the payment of dividends of 1,530 million yen.

As a result, the outstanding balance of cash and cash equivalents was 21,958 million yen at the end of the fiscal year, down 2,339 million yen.

(Reference) Trends in cash flow indicators for the fiscal year under review

	Year ended March 2004	Year ended March 2005	Year ended March 2006	Year ended March 2007	Year ended March 2008
Shareholders' equity ratio (%)	69.3	72.7	70.1	71.9	74.1
Market value-based shareholders' equity ratio (%)	50.8	87.4	77.8	76.8	47.2
Years needed to repay debts	0.8	0.6	0.5	0.4	0.6
Interest coverage ratio	134.7	117.6	173.2	124.3	69.1

Note: Shareholders' equity ratio = Shareholders' equity ÷ Total assets

Market value-based shareholders' equity ratio = Market capitalization ÷ Total assets

Years needed to repay debts = Interest-bearing debts ÷ Operating cash flows

Interest coverage ratio = Operating cash flows ÷ Interest payments

*Each indicator is calculated using consolidated financial data.

*Market capitalization is calculated by multiplying stock closing prices at the end of the fiscal year by the number of outstanding shares (excluding treasury shares) at the end of the fiscal year.

Interest-bearing debts represent total debts recorded in the consolidated balance sheets on which interest is paid.

For interest payments, data on interest expenses in the consolidated cash flow statement are used.

(3) Basic policies for profit distribution, and dividends for fiscal 2007 and 2008

The Company regards the returning of profits to shareholders as one of its key managerial measures, and makes it a basic policy to continuously provide shareholders with stable returns, by improving and reinforcing its corporate structure and expanding competitive businesses while securing the necessary internal reserves.

The Company has set the minimum trading unit at 100 shares, aiming to have its shares spread further among investors and to have its shares more widely circulated on the market.

We will continue to provide an environment where investors can easily invest in our stock, and implement and work out measures for enhancing the liquidity of our shares on the market.

(4) Business risks

(1) High dependence on certain business partners with which continuation of transactions is unstable

The Company imports and sells artificial ventilators, pacemakers, defibrillators, heart catheters and other devices and equipment. We strive to ensure we can securely continue making transactions while taking sufficient care to avoid excessive reliance on such transactions.

(2) Legal regulations

In Japan, the Company is subject to regulations under the Pharmaceutical Affairs Law, which require us to establish a department that takes care of the safety of the equipment after sales and appoint a safety manager, as well as compiling manuals for investigation operations conducted after sales.

The Company has established a department specializing in the central management of safety-related information, through which we will further strengthen our safety management systems so that customers can use our equipment without anxiety.

In addition, the Company's domestic sales activities are governed by the Fair Competition Regulations according to the Law for the Prevention of Unreasonable Premiums and Misrepresentation Concerning Products and Services.

Furthermore, the Company owns customer information and confidential sales-related data in relation to the implementation of its businesses. The Company carefully handles that information to ensure that it is not easily compromised. To this end, we are striving to step up the surveillance of in-house networks while limiting access to such information.

(3) Time required to commercialize new products and technologies

The manufacture and sales of medical equipment are subject to regulations prescribed in the Pharmaceutical Affairs Law. Consequently, there are cases where a certain period of time is required before approval is granted by the relevant independent administrative corporation.

In addition, some medical equipment requires clinical trials, and significant time is needed to bring it to market.

(4) Effect of medical administration

The government is proceeding to improve the quality of medical care and curtail medical treatment expenses. Hence, the medical equipment industry must adapt to the changes in the operating environment brought about by major shifts in the policies of medical authorities.

Moreover, once nearly every two years, the government implements official revisions affecting treatment payments, pharmaceutical prices, and the official prices of specific medical materials covered by insurance. Such revisions may lead to intensified price competition, causing a reduction in sales prices.

(5) Risks accompanying overseas businesses

The Company not only supplies products to distributors overseas, but also has its own overseas sales, development and production bases. Hence, it is possible that unforeseen changes to laws and regulations in foreign countries, as well as terrorist acts, natural disasters, or other incidents could adversely affect the Company's business performance and financial position.

(6) Important business relationships between the Company and its executives or shareholders with voting rights

Basic policy on relations with related parties

Relationship with Atomic Sangyo Co., Ltd.

Fukuda Denshi's shareholder Atomic Sangyo Co., Ltd. holds 12.93% of the Company's voting rights (as of March 31, 2008). Kotaro Fukuda, President and CEO of the Company, and his close relatives own 100% of the shares in Atomic Sangyo.

Atomic Sangyo produces and sells electrocardiogram recording paper, and also engages in the business of renting real estate. The Company purchases recording paper and accounting slips and rents offices from Atomic Sangyo.

Decisions on the prices of recording paper and accounting slips are based on negotiations and consideration of market prices, and payment terms are the same as those generally adopted in the marketplace.

Office rental contracts are based on actual transactions in nearby locations.

2. The Fukuda Denshi Group

3. Management policy

(1) Basic policies for corporate management

Since its foundation in 1935, the Company has contributed significantly to the advancement of people's health through the production and sale of a wide range of medical equipment, centering on respiratory and circulatory systems such as electrocardiographs, under our corporate philosophy to "Contribute to medical advances by fulfilling our social mission and developing medical equipment."

Responding to significant changes in the social environment, medical equipment has increasingly been expected to play roles not only in the conventional diagnostics and treatment of diseases but also in the maintenance and improvement of health and the enhancement of quality of life (QOL).

Against this backdrop, under the slogan of "safety, reliability and comfort," the Company will make every effort to raise the quality of products to offer to customers, develop products that provide differentiation from our competitors, and carry out product strategies that meet varying medical needs, aiming to become **a company that is trusted by customers**.

(2) Targeted management indices

The Company basically aims for continued growth and securing certain profitability, targeting a consolidated ordinary income of 10.0 billion yen, an ordinary income margin of 10% or more and a payout ratio of 30% or more by fiscal 2012.

(3) Medium- to long-term management strategies

As its medium-term goal, the Company continuously formulates a three-year medium-term business plan, under which it examines group-wide issues when necessary, and implements solutions to the issues.

The basic management strategies for the new three-year medium term business plan starting from the year ending March 2009 are as follows:

(i) Policies of the medium-term business plan

To establish a further solid management structure based on the **customer-first principle**, responding to the progress of an aging society with fewer children and changes in the medical environment following medical system reforms, in Japan.

(ii) Business strategies

To proactively make investments while focusing on efficient management;

To promote the expansion of businesses by domain;

To strengthen the corporate structure in order to improve the efficiency of development processes; and

To increase productivity by pursuing overall optimum solutions from development to production.

(iii) Sales strategies

To capture the acute care market;

To enhance operations in the homecare market; and

To expand the maintenance service business.

(iv) Improvement of the management system

To strengthen the corporate governance and compliance structure;

To revitalize the overall organization through personnel training and education for employees; and

To enhance the group management system.

(v) Increase of corporate value

To establish a stable earnings structure and return profits to shareholders;

To actively tackle environmental issues; and

To contribute to society through our medical equipment.

(4) Issues to be addressed

In Japan, various medical system reforms have been carried out, including: the revision of official reimbursement prices for medical treatment fees, drug prices and specific medical materials covered by insurance; an increasing adoption of the comprehensive medical fee payment system, called diagnosis procedure combination (DPC); and the implementation of a new medical insurance system for elderly persons aged 75 or over.

Given the above and possible future reforms, we expect our market environment to remain severe. Against this backdrop, the Company will continue to strive to raise its corporate value, develop products that provide differentiation from our rivals, strengthen the maintenance service and supplies sales businesses to secure profits, make investments for enhancing the sales system, and reduce costs to become more price competitive than our rival manufacturers at home and abroad.

Furthermore, the Company will continuously strengthen and maintain its quality control and safety management systems so that customers can use our products without anxiety, and improve the internal control system to ensure managerial soundness and transparency.

(5) Status of improvement and implementation of the internal control system

The status of improvement and implementation of the internal control system is described in “Basic stance on the internal control system and the status of its improvement” in the report concerning corporate governance.

(6) Other important managerial matters of the Company

(i) Acquisition of treasury stock

The Company may purchase its own shares by resolution of the Board of Directors, in accordance with the provisions of Article 165, Paragraph 2 of the Company Law. This was determined upon the approval of amendment to the Articles of Incorporation at the Ordinary General Meeting of Shareholders held in June 2006. However, the Company did not acquire any treasury stock during the fiscal year under review, except for the purchase of shares less than a trading unit, comprehensively taking into account the economic situation, trends in the Company's stock price and its financial conditions.

The Company owns 340,139 shares of treasury stock as of the end of March 2008.

(ii) Important contracts concerning management

There are no applicable matters.

4. Accounting standards	(1) Valuation standards and methods for principle assets (i) Securities Held-to-maturity securities - Amortized cost method Other securities Marketable securities - Stated at fair value based on the market price as of the end of this fiscal year. (Unrealized holding gains or losses are reported in a component of net assets, while the cost of securities sold is calculated by the moving average method.) Non-marketable securities - Stated at cost based on the moving average method. For investments in the investment enterprise limited Liability association and similar associations (deemed to be securities pursuant to Article 2, Paragraph 2 of the Securities and Exchange Law), the net amount corresponding to the ownership percentage is used, based on the most recent financial statements available as of the reporting date and other material stipulated in the partnership contract. (ii) Inventories Merchandise and products - Mainly stated at cost determined by the first-in, first-out method. Raw materials - Mainly stated at cost determined by the gross average method. Work in progress - Mainly stated at cost based on the specific cost method. Supplies - Stated based on the last purchase price method. 	(2) Depreciation method for significant depreciable assets (i) Tangible fixed assets Depreciated primarily by the declining balance method. However, buildings (except for building attachments) acquired on or after April 1, 1998 were depreciated using the straight-line method. Major useful life: Buildings and structures: 3–60 years Machinery and delivery equipment: 4–12 years Tools, instruments and fixture: 2–20 years Assets with an acquisition cost of 100,000 yen or more but less than 200,000 yen were evenly amortized over a three-year period. Of the tools, instruments and fixtures, the oxygen concentrator devices (assets for rental) were depreciated using the straight-line method with the estimated rental period (four years) used as the number of depreciation years.	(2) Depreciation method for significant depreciable assets (i) Tangible fixed assets Same as on the left
	-	(Changes in accounting policies) In accordance with the revision of the Corporate Tax Law, from this fiscal year, the Company has changed the depreciation method for tangible fixed assets acquired on or after April 1, 2007 to the method stipulated in the revised Corporate Tax Law. This change had little effect on our consolidated earnings for this fiscal year.

	Previous fiscal year (April 1, 2006 to March 31, 2007)	Fiscal year under review (April 1, 2007 to March 31, 2008)
	-	(Additional information) In accordance with the revision of the Corporate Tax Law, as for assets acquired on or before March 31, 2007 that were fully depreciated to the maximum allowable amount using the depreciation method stipulated in the Corporate Tax Law before its revision, the Company evenly depreciated the residual book value up to the reminder value over five years, from the next consolidated fiscal year to the consolidated fiscal year in which those assets were depreciated to the maximum allowable amount. This practice had little effect on our consolidated earnings for this fiscal year.
	(ii) Intangible fixed assets Depreciated by the straight-line method. Software for internal use is amortized by the straight-line method over its useful life of five years. As for software for sale in the market, the Company records the larger of an amortization based on projected sales volume for the effective sales period (no longer than three years) or a uniform amortization over the effective remaining sales period.	(ii) Intangible fixed assets Depreciated by the straight-line method. Same as on the left
	(3) Basis for provision of allowances (i) Allowance for doubtful accounts To prepare for losses incurred by bad debts, the amount of potential loss is calculated by using the historical loss ratio in the case of general loans or receivables. Potential loss for specific loans or receivables, for which we have concerns regarding their collectability, is calculated by assessing the possibility of collection for each individual account. 	(v) Allowance for retirement benefits to employees To prepare for the payment of retirement benefits to employees, the amount recognized as accruing at the end of this fiscal year was reserved, based on the estimated retirement benefit obligation and pension assets at the end of this fiscal year. Prior service costs are amortized, using the straight-line method over a certain number of years (10 years), which are less than the average remaining years of service of the employees when they incurred. Actuarial differences are amortized, using the straight-line basis over a certain number of years (10 years), which are less than the average remaining years of service of the employees when they incurred, from the fiscal year after the one in which they arise. (f) Allowance for retirement benefits to officers To prepare for the payment of retirement benefits to directors and corporate auditors, the estimated amount to be paid at the end of the fiscal year was reserved, in accordance with the internal regulations. However, the Company abolished such retirement benefit program on June 29, 2005, and the estimated amount to be paid to directors and corporate auditors, who are in office on the day of abolishing the program, was reserved as **Allowance for retirement benefits to officers**.	(v) Allowance for retirement benefits to employees Same as on the left (f) Allowance for retirement benefits to officers To prepare for the payment of retirement benefits to directors and corporate auditors, some consolidated subsidiaries reserve the estimated amount to be paid at the end of the fiscal year, in accordance with the internal regulations.

	(4) Standards for translation of important foreign currency-based assets or liabilities in to Japanese yen Monetary credits and debts denominated in foreign currencies are translated into yen based on the current exchange rates at the end of each fiscal year. Differences arising from such translation are stated as profits or losses. Assets, liabilities, revenue and expenses of overseas subsidiaries, and other financial items are translated into yen based on the current exchange rates at the end of each fiscal year. The resulting differences are recorded as **Foreign currency translation adjustment account** and **Minority interests**, under **Net assets**. Previous fiscal year (April 1, 2006 to March 31, 2007)	Fiscal year under review (April 1, 2007 to March 31, 2008)
(Accounting standards for presentation of net assets in the balance sheets) Beginning this fiscal year, the Company adopted the “Accounting Standards for Presentation of Net Assets in the Balance Sheets” (Corporate Accounting Standards No. 5, December 9, 2005) and the “Guidelines for the Application of the Accounting Standards for Presentation of Net Assets in the Balance Sheets” (Guidelines for the Application of Corporate Accounting Standards No. 8, December 9, 2005). This adoption has little effect on profits and losses. The amount corresponding to the conventional **Total shareholders’ equity** in the balance sheets was 74,570 million yen. Along with the revision to the Regulations on Consolidated Financial Statements, the consolidated financial statements for this fiscal year were prepared in accordance with the revised regulations.	-

Change in presentation

Previous fiscal year (April 1, 2006 to March 31, 2007)	Fiscal year under review (April 1, 2007 to March 31, 2008)
(Consolidated balance sheets) Under **Long-term liabilities**, the item reported as **Consolidated adjustment account** in the previous fiscal year was presented as **Negative goodwill** from this fiscal year.	(Consolidated balance sheets) **Allowance for retirement benefits to officers**, which was separately reported in the previous fiscal year, was presented as **Other** under **Long-term liabilities** from this fiscal year. This change was made because the First Audit Committee Report No. 42, “Audit Treatment for Reserves of Special Taxation Measures Law, Allowances or Reserves of Special Law, and Allowances for Retirement Benefits to Officers,” was announced on April 13, 2007. The amount of retirement benefits to officers included in **Other** for this fiscal year was 854 million yen.
-	(Consolidated statements of cash flows) **Increase or decrease in allowance for losses on restructuring**, which was included in **Losses on restructuring** in the previous fiscal year, was separately presented from this fiscal year. In the previous fiscal year, **Increase or decrease in allowance for losses on restructuring** was minus 2,126 million yen.

*7. Impairment losses The Company groups its operations by business segment, and consolidated subsidiaries form their grouping with each company or office as one unit. Impairment losses on leased real estate and idle assets are recognized separately. Because of a decrease in cash flows caused by a declined operating income, we have written down the book values of the following assets to recoverable values. These write-offs have resulted in impairment losses (of 22 million yen), which were booked as extraordinary losses. These impairment losses consist of the losses on buildings and structures of 1 million yen; on tools, instruments and fixtures of 11 million yen; and on other assets of 10 million yen. The recoverable value was assessed according to the net sale value, and the market prices were evaluated according to roadside land prices or the assessed value of fixed asset tax, with reasonable adjustments.	*7. Item	Previous fiscal year (from April 1, 2006 to March 31, 2007)	Fiscal year under review (from April 1, 2007 to March 31, 2008)
1. Valuation standards and methods for securities	(1) Held-to-maturity bonds - Amortized cost method (2) Shares of subsidiaries and affiliates - Stated at cost based on the moving average method. (3) Other securities Marketable securities - Stated at fair value based on the market price as of the end of the fiscal year. (Unrealized holding gains or losses are reported in a component of net assets, with the cost of securities sold is calculated by the moving average method.) Non-marketable securities - Stated at cost based on the moving average method. For investments in the investment enterprise limited Liability association and similar associations (deemed to be securities pursuant to Article 2, Paragraph 2 of the Securities and Exchange Law), the net amount corresponding to the ownership percentage is used, based on the most recent financial statements available as of the reporting date and other materials stipulated in the partnership contract. 3. Depreciation method for fixed assets	(1) Tangible fixed assets Depreciated by the declining balance method. However, buildings (except for building attachments) acquired on or after April 1, 1998 were depreciated using the straight-line method. Major useful life: Buildings: 3–50 years Structures: 10–60 years Machinery and equipment: 8–12 years Vehicles and delivery equipment: 4–6 years Tools, instruments and fixtures: 2–20 years Assets with an acquisition cost of 100,000 yen or more but less than 200,000 yen were evenly amortized over a three-year period. Of the tools, instruments and fixtures, the oxygen concentrator devices (assets for rental) were depreciated by the straight-line method with the estimated rental period (four years) as a depreciation year.	(1) Tangible fixed assets Same as on the left
	-	(Changes in accounting policies) In accordance with the revision of the Corporate Tax Law, from this fiscal year, the Company has changed the depreciation method for tangible fixed assets acquired on or after April 1, 2007 to the method stipulated in the revised Financial Instruments and Exchange Law. This change had little effect on earnings for this fiscal year.

	- (2) Intangible fixed assets Depreciated by the straight-line method. Software for internal use is amortized by the straight-line method over its useful life of five years. As for software for sale in the market, the Company records the larger of an amortization based on projected sales volume for the effective sales period (no longer than three years) or a uniform amortization over the effective remaining sales period.	(Additional information) In accordance with the revision of the Corporate Tax Law, from this fiscal year the Company has changed the depreciation method for tangible fixed assets acquired on or before March 31, 2007 that are fully depreciated to the maximum allowable amount using the depreciation method stipulated in the pre-revision Corporate Tax Law. From this fiscal year, the depreciation method used by the Company is the one in which it evenly depreciates the residual book value up to the reminder value over five years, from the next fiscal year of the fiscal year in which these assets are depreciated to the maximum allowable amount. This practice had little effect on earnings for this fiscal year. (2) Intangible fixed assets Same as on the left

4. Basis for provision of allowances	(1) Allowance for doubtful accounts To prepare for losses incurred by bad debts, the amount of potential loss is calculated by using the historical loss ratio in the case of general loans or receivables. Potential losses for specific loans or receivables, for which we have concerns regarding their collectability, are calculated by assessing the possibility of collection for each individual account. (2) Allowance for valuation of investments To prepare for losses on investments in subsidiaries and similar organizations, we reserve the necessary amount while taking into account financial conditions of subsidiaries and other factors. (3) Allowance for bonuses to employees To prepare for the payment of bonuses to employees, we reserve an amount corresponding to this fiscal year's portion of estimated bonus payments to employees. (4) Allowance for bonuses to officers To prepare for the payment of bonuses to directors and corporate auditors, we reserve an amount corresponding to this fiscal year's portion of estimated bonus payments to directors and corporate auditors. (Changes in accounting policies) Beginning this fiscal year, the Company adopted the Accounting Standards for Directors' Bonuses (Corporate Accounting Standards No. 4, November 29, 2005). This adoption has little effect on profits and losses. 	(5) Allowance for losses on liquidation of affiliates To prepare for losses on liquidation of affiliates, the amount of the estimated losses was reserved. (6) Allowance for retirement benefits to employees To prepare for the payment of retirement benefits to employees, the amount recognized as accruing at the end of this fiscal year was reserved, based on estimated retirement benefit obligation and pension assets at the end of this fiscal year. Actuarial differences are amortized, using the straight-line basis over a certain number of years (10 years), which are less than the average remaining years of service of the employees when they incurred, from the fiscal year after the one in which they arise. (7) Allowance for retirement benefits to officers The We abolished the officers'' retirement benefit program was abolished on June 29, 2005. "**Allowance for retirement benefits to officers**" represents the estimated amount to be paid to directors and corporate auditors, who were in office on the day of abolishing the program. Change in accounting methods

Previous fiscal year (from April 1, 2006 to March 31, 2007)	Fiscal year under review (from April 1, 2007 to March 31, 2008)
(Accounting standards for presentation of net assets in the balance sheets) Beginning this fiscal year, the Company adopted the “Accounting Standards for Presentation of Net Assets in the Balance Sheets” (Corporate Accounting Standards No. 5, December 9, 2005) and the “Guidelines for the Application of the Accounting Standards for Presentation of Net Assets in the Balance Sheets” (Guidelines for the Application of Corporate Accounting Standards No. 8, December 9, 2005). This adoption has little effect on profits and losses. The amount corresponding to the conventional **Total shareholders’ equity** in the balance sheets was 59,660 million yen. Along with the revision to the Regulations on Financial Statements, the financial statements for this fiscal year were prepared in accordance with the revised regulations.	-

-	(Balance sheets) **Allowance for retirement benefits to officers**, which was separately reported in the previous fiscal year, was presented as **Long-term other accounts payable** under **Long-term liabilities** from this fiscal year. We made this change because the First Audit Committee Report No. 42, “Audit Treatment for Reserves of Special Taxation Measures Law, Allowances or Reserves of Special Law, and Allowances for Retirement Benefits to Officers,” was announced on April 13, 2007.
-	(Statements of income) **Investment partnership losses**, which was included in **Other** under **Non-operating expenses** in the previous fiscal year, was separately presented from this fiscal year as the amount of such losses exceeded 10/100th of non-operating expenses. In the previous fiscal year, **Investment partnership losses** were 14 million yen.
