Note: There have been no revisions of numerical values of consolidated earnings projections in the current quarter.

- 4. Others
- (1) Change in significant subsidiaries during the term (change in specific subsidiaries involving change in the scope of consolidation): None
- (2) Application of simplified accounting method and accounting principles specific to the preparation of consolidated quarterly financial statements: Yes

Note: For details, please refer to **4. Others** in the "Qualitative Information and Financial Statements" section on page 6.

- (3) Change in accounting principles and procedures, presentation related to the preparation of consolidated quarterly financial statements (described in changes in basic significant matters regarding the preparation of consolidated quarterly financial statements)
 - (i) Changes owning to adoption of revised accounting standards or such like: Yes
 - (ii) Changes other than (i) above: Yes
 - Note: For details, please refer to **4**. **Others** in the "Qualitative Information and Financial Statements" section on page 6.
- (4) Number of outstanding issues (common stock)

1)	Number of outstanding shares at the end of the period (including treasury stock)				
	First quarter of the year ending March 31, 2009:	19,588,000 shares			
	Year ended March 31, 2008:	19,588,000 shares			
2)	Number of treasury shares at the end of the period				
	First quarter of the year ending March 31, 2009:	340,119 shares			
	Year ended March 31, 2008:	340,139 shares			
3)	Average number of shares during the period (accur	mulated consolidated quarterly period)			
	First quarter of the year ending March 31, 2009:	19,247,851 shares			

First quarter of the Year ended March 31, 2008: 19,230,475 shares

*Explanation about appropriate use of the forecasts of financial results, and other noteworthy matters

1. The forecasted financial results described above are based on information available as of August 5, 2008. Actual results may differ from the results projected and presented hereby for a variety of reasons.

2. With respect to the preconditions for the forecasts of financial results, please refer to "3. Qualitative information about consolidated earnings forecast for the fiscal year ending March 2009" in the "Qualitative Information and Financial Statements" section on page 6.

3. Effective from the consolidated fiscal year ending March 2009, the Company adopted the "Accounting Standard for Quarterly Financial Reporting" (Accounting Standards Board of Japan Report No. 12) and the "Implementation Guidance on the Accounting Standard for Quarterly Financial Reporting" (ASBJ Implementation Guidance No. 14). Consolidated quarterly financial statements are prepared in conformity with the "Regulations of Consolidated Quarterly Financial Statements." Qualitative Information and Financial Statements

1. Qualitative information about consolidated operating results

During the first quarter under review, the economic environment remained uncertain, as exemplified by the price hikes of crude oil and raw materials, abrupt exchange rate fluctuations and misgivings about the effects of the subprime mortgage problem in the U.S. on the real economy. The feeling began to spread that exports, which had supported growth, would slow, and there is concern about a worsening of corporate earnings that have been on a recovery track.

In the medical equipment industry, institutional changes were pushed forward with, including the revision of medial treatment fees in April 2008 and expansion of the adoption of the comprehensive medical fee payment system, called DPC (diagnosis procedure combination), at medial institutions. Meanwhile, efforts were made to pursue medical efficiency and curb medical fees, including a further division of functions between hospitals and clinics and an expansion of the field of home medical treatment.

Under such circumstances, the Group posted consolidated net sales of 20,054 million yen, operating income of 1,041 million yen, ordinary income of 1,140 million yen and quarterly net income of 629 million yen.

(1) Physiological diagnostic equipment segment

Sales of electrocardiographs and retinal cameras increased partly because of the influence of the start of compulsory specific medical checkups in April 2008, but sales of ultrasound diagnostic imaging systems dropped both at home and abroad.

As a result, consolidated sales were 4,625 million yen.

(2) Patient monitoring equipment segment

With a decrease in the number of large business talks, including high-end monitors that are purchased, sales were 995 million yen.

(3) Medical treatment equipment segment

Sales of automated external defibrillators (AEDs) increased substantially, and the business of renting medical equipment for home treatment (including oxygen-concentrator devices, equipment used to treat sleep apnea syndrome and homecare ventilators) remained steady.

As a result, sales were 8,929 million yen.

(4) Other products and accessories segment

In this segment, we mainly handle recording paper, disposable electrodes and accessories and consumables used for devices handled by the other segments.

Sales of this segment were 5,504 million yen.

2. Qualitative information about consolidated financial situation

Total assets were 100,552 million yen at the end of the first quarter under review, up 966 million

yen from the end of the previous fiscal year.

The increase is mainly because of an increase of 2,670 million yen in cash and deposits, an increase of 839 million yen in merchandises and an increase of 583 million yen in tangible fixed assets, despite a decrease of 3,324 million yen in trade notes and accounts receivable.

Liabilities amounted to 26,912 million yen, up 1,159 million yen from the end of the previous fiscal year.

The increase is chiefly because of an increase of 906 million yen in trade notes and accounts payable and an increase of 861 million yen in allowance for bonuses to employees.

Net assets were 73,640 million yen, down 193 million yen from the end of the previous fiscal year.

The decrease is primarily attributable to a decline of 122 million yen in retained earnings and a drop of 146 million yen in foreign currency translation adjustment account.

3. Qualitative Information about consolidated earnings forecast for the fiscal year ending March 2009

With earnings in the first quarter under review generally in line with the projections, there is no change in our forecast of financial results for the accumulated period up to the second quarter and for the full fiscal year, which we announced in the summary of consolidated financial results released on May 19, 2008.

4. Others

 (1) Change in significant subsidiaries during the term (change in specific subsidiaries involving change in the scope of consolidation) Not Applicable.

Not Applicable.

- (2) Application of simplified accounting method and accounting principles specific to the preparation of consolidated quarterly financial statements
 - Simplified accounting treatment Not Applicable.
 - 2) Accounting principles specific to the preparation of consolidated quarterly financial statements Subsidiaries calculate tax expenses by first rationally estimating the effective income tax rate after applying income tax allocation accounting on net income before taxes for the consolidated fiscal year, including the first quarter under review, and then multiplying the quarterly net income before taxes by the said effective income tax rate. Corporate tax adjustments are included in corporate, inhabitants' and enterprise taxes.
- (3) Change in accounting principles and procedures, presentation related to the preparation of consolidated quarterly financial statements:

- (i) Effective from the consolidated first quarter under review, the Company adopted the "Accounting Standard for Quarterly Financial Reporting" (Accounting Standards Board of Japan Report No. 12, March 14, 2007) and the "Implementation Guidance on the Accounting Standard for Quarterly Financial Reporting" (ASBJ Implementation Guidance No. 14, March 14, 2007). Consolidated quarterly financial statements are prepared in conformity with the "Regulations of Consolidated Quarterly Financial Statements."
- (ii) Change in valuation standards and methods for inventories

Previously, ordinary inventories held for the purpose of sales were mainly stated at cost determined by the first-in, first-out method. With the application of the "Accounting Standards for Measurement of Inventories" (ASBJ Report No. 9, July 5, 2006), inventories are primarily stated at cost determined by the first-in first-out method (with regard to the amounts stated in the balance sheets, the method of book value devaluation based on decline in profitability is used), effective from the first quarter under review.

This change had little effect on our operating income, ordinary income and quarterly net income before taxes.

 (iii) Application of the "Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for Consolidated financial Statement"

Effective from the first quarter under review, the Company adopted the "Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for Consolidated financial Statement" (ASBJ Practical Solution No. 18, May 17, 2006), and made revisions necessary for consolidated settlement of accounts.

This change had little effect on our operating income, ordinary income and quarterly net income before taxes.

(iv) Application of accounting standard for lease transactions

Previously, finance lease transactions in which the ownership of the leased properties did not transfer to the lessees underwent the same accounting treatment as ordinary lease transactions. Since the "Accounting Standard for Lease Transactions" (ASBJ Report No. 13 (June 17, 1993 (First Sectional Committee of the Business Accounting Council), amended on March 30, 2007) and the "Implementation Guidance on the Accounting Standard for Lease Transactions" (ASBJ Implementation Guidance No. 16 (January 18, 1994 (Accounting Committee of the Japanese Institute of Certified Public Accountants), amended on March 30, 2007) became applicable from the consolidated quarterly financial statements concerning the consolidated fiscal years starting on or after April 1, 2008, the Company adopted these accounting standards and used the accounting method for ordinary lease transactions, effective from the first quarter under review.

Depreciation of leased assets concerning finance lease transactions in which the ownership of the leased properties does not transfer to the lessees is calculated using the straight-line method over the lease terms without residual value.

Finance lease transactions in which the ownership of the leased properties does not transfer to the lessees and that started before the first year of the application of the lease accounting standards and similar regulations undergo the same accounting treatment as ordinary lease transactions, the same as they did before.

This change had little effect on our operating income, ordinary income and quarterly net income before taxes.

Effective from the fiscal year ending March 2009, the Company adopted the "Standard for Quarterly Financial Reporting" (ASBJ Report No. 12, March 14, 2007) and the "Implementation Guidance on the Standard for Quarterly Financial Reporting" (ASBJ Implementation Guidance No. 14, March 14, 2007).

Consolidated quarterly financial statements are prepared in conformity with the "Regulations of Consolidated Quarterly Financial Statements."

 Note concerning premise of going concern Not applicable.

(4) Segment information

a. Segment information by business type

Consolidated first quarter under review (from April 1 to June 30, 2008)

Segment information by business type is omitted because the amounts of sales, operating income and assets of the medical electronic equipment business account for over 90 percent of the total sales, total operating income and total assets of all segments.

b. Segment information by geographic area

Consolidated first quarter under review (from April 1 to June 30, 2008)

Segment information by geographic area is omitted because the amounts of sales and assets in Japan account for over 90 percent of the total sales and total assets of all segments.

c. Overseas sales

Consolidated first quarter under review (from April 1 to June 30, 2008)

Overseas sales are omitted because such sales accounted for less than 10 percent of consolidated sales.

(5) Note when there is a significant fluctuation in the amount of shareholders' equity Not applicable.
