Production to Recommence at Fukuda Denshi Tagajo Laboratory

We would like to express our deepest sympathies to everyone affected by the Great East Japan Earthquake and offer our prayers for the speediest possible recovery in the region.

Operations at Fukuda Denshi Tagajo Laboratory (located in Tagajo, Miyagi Prefecture), part of the Fukuda Denshi Group, have been suspended due to the impact of the Great East Japan Earthquake, but production is now expected to recommence as of July 1.

We would like to sincerely thank our customers, business partners and everyone else for their words of encouragement and the generous support and assistance they have provided.

As of the present we have been able to meet demand for nearly all the products we handle, with a few exceptions. Damage to companies that supply us with certain electrical components could cause delivery delays or supply disruptions for a period of time for some products.

The Fukuda Denshi Group will continue to make every effort to ensure stable supplies of our products.
